ROLLER BLIND CONTROLLER SRP-04

- Designed to wired control of roller blind, sunblind and gate drives,
- control of devices driven by 230 V AC one-phase motors
- a possibility of independent operation or group connection,
- local control realised by means of a single or double roller blind push-button,
- central control realised only by means of double roller blind push-buttons,
- a possibility to block the roller blind position (opened or closed) by means of central inputs,
- a cooperation possibility with the alarm system and additional devices (e.g. rain sensors, control timers, luminous flux intensity sensors),
- N line release only,
- for advanced central control, a possibility to connect controllers to different phases,
- comfort mode – up and down – roller blind position memory,
- programmable maximum roller blind movement,
- a possibility of cooperation with the exta free system by applying the SRP-03 central line controller.

230 V AC; 50/60 Hz; 0,55 W; IP20

Weight: 0,042 kg

PN-EN 61000, PN-EN 60669

Made in Poland

The symbol means selective collecting of electrical and electronic equipment. It is forbidden to put the used equipment together with other waste.

Declaration of Conformity is on www.zamel.com
