RADIO TEMPERATURE AND LUMINOUS INTENSITY FLUX SENSOR **RCL-02**

Wireless temperature and luminous flux intensity sensor RCL-02 is designed for a direct cooperation with selected extra free system receivers. This sensor does not cooperate with EFC-01 and EFC-02 controllers. It can be successfully used in the roller blind control or to maintain thermal comfort at home. After adjusting the pre-set and the hysteresis values, the sensor sends appropriate switching on / switching off commands to its assigned system receivers. The interface in the form of four push buttons and a display allows to quickly adjust the data and to read the current temperature and luminous intensity values. The sensor is battery powered (2 x LR03 AAA). High casing protection degree of the sensor (IP54) allows it can be mounted outdoor. Additionally the sensor has a special software solutions extending battery life. Wide measuring range, high measuring accuracy and wide operation range are additional advantages of the sensor.

3 V DC; 2x AAA / R03; IP20
Weight: 0,09 kg
PN-ETSI EN 300 220-1
PN-ETSI EN 300 220-2

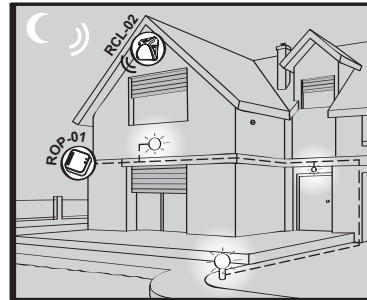

The symbol means selective collecting of electrical and electronic equipment. It is forbidden to put the used equipment together with other waste.

SCAN

the technical
data

- temperature measuring in the range of -20 ++60 °C
- luminous flux intensity measuring in the range of 0 -165 000 lx
- wireless communication only with selected extra free system receivers
- interface in the form of 4 push buttons and a display useful during data adjustment
- mounting possibility outdoor (IP54)
- battery operated
- wide operation range (up to 200 m in the open area)

ZAMEL Sp. z o.o. declares that the device complies with principal requirements and other applicable rules of the 1999/5/WE Directive. Declaration of Conformity is at www.zamelcet.com
