## RADIO MOTION SENSOR RCR-01

- PIR motion passive detector,
- built-in twilight switch (a possibility of switching off the sensor's operation),
- EXTA FREE system receivers remote control,
- easy mounting, easy adaptation to the operating condition changes,
- battery operated.

RCR-01 radio motion sensor is an independent battery powered transmitter. The sensor detects heat radiation changes caused by the presence or movement of an object which is in the operation range.

After movement detection the system sends a radio signal to a programmed receiver or a group of receivers which control lighting. The motion sensor is resistant to the ambient temperature changes and to air thermal motion. Operation mode with twilight sensor (with adjusted sensitivity of luminous density measurement) enables to limits sensor's operation range to operation after twilight.

ZAMEL hereby declares that the device is compatible with the essential requirements and other relevant provisions of Directive 1999/5/EC. Declaration of Conformity can be found on the web page [www.zamel.com](http://www.zamel.com)
