RADIO REPEATER REP-21

- rated supply voltage of 230 V AC,
- cooperation with the components of EXTA LIFE system (controller, receivers, transmitters, sensors),
- up to 250 m in the open,
- easy and intuitive handling from the application,
- installation in outlet boxes Ø60 mm,
- option for remote update of the software.

REP-21 repeater extends the operating range of devices working in EXTA LIFE system. This applies both to the communication between receivers, sensors and transmitters as well as the EFC-01 controller, and direct communication between radio transmitters and EXTA LIFE receivers (without the controller). A single transmitter increases the operating range of about 250 m in the open. The device is powered by the voltage of 230 V AC and is designed for mounting in Ø60 outlet boxes.

230 V AC; IP20
Net weight: 0.025 kg
ETSI EN 300 220-1
ETSI EN 300 220-2

ZAMEL Sp. z o.o. certifies that this device meets the essential requirements and applicable provisions of the directive 2014/53/EU.
The Declaration of Conformity can be found at www.zamel.com
