GSM REMOTE SWITCH GRG-01

- remote control of electric device operation by means of commands (incoming voice call, SMS messages) send from a mobile phone,
- comfortable control of devices with difficult access (ventilation, heating, other),
- three operation modes (switching on, switching off, restart - contact relay position change for adjusted time),
- easy mounting in 230 V AC socket,
- low power consumption, possibility of constant work.

GSM remote switch is used to control lighting, heating, etc., by means of GSM mobile (SMS message and/or incoming mobile call). It is mounted in wall 230 V AC socket and it has the possibility of a remote restart of a connected device (relay status changes according to the adjusted time). The device has a wide range of protections as a list of numbers with permission, access password, etc. Its operation range is limited only by GSM network infrastructure and it is not equipped with operators lock (SIMLOCK).

Note: The remote switches GRG-01 does not work with EXTA FREE devices.
