## 4-CHANNEL BUTTON TRANSMITTER WITH TEMPERATURE SENSOR **RNK-24**

The RNK-24 wall radio transmitter is used to send control signals and temperature value related information in the EXTA LIFE system. It is applied to realise the following functions: switching on/switching off, brightening/dimming, roller blind control. Temperature value is displayed in the mobile application due to the cooperation of the transmitter with the EXTA LIFE controller. The battery backup and lack of wiring allows for its wide application. It means the transmitter can be mounted on any surface (excluding metal surface) and in any place.

3 V DC; CR 2032; IP20  
Net weight: 0,038 kg  
ETSI EN 300 220-1  
ETSI EN 300 220-2

III CE 1471

The symbol means selective collecting of electrical and electronic equipment. It is forbidden to put the used equipment together with other waste.

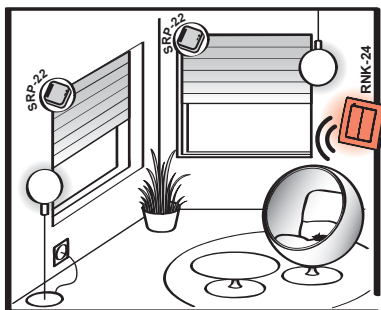

SCAN

the technical  
data

- 2-button (4-channel) radio transmitter,
- remote control of EXTA LIFE receivers,
- possibility of independent control of four receivers,
- coded radio transmission,
- integrated inner temperature sensor,
- temperature measurement realised by means of a sensor:  $-40 \pm +125^{\circ}\text{C}$ ,
- battery powered,
- charge / discharge battery optical signalling
- wide operation range (up to 300 m in the open area).

ZAMEL Sp. z o.o. declares that the device complies with principal requirements and other applicable rules of the 2014/53/UE Directive.
